WHAT TO WEAR IN COURT CIRCLES

In the matter of uniforms, the old Hawaiian monarchy had its styles and its etiquette, which could in no wise be departed from. Last summer, when some court chamberlain at some period unknown laid down what was what, a copy of his rulings being found recently in the Territory's archives. The paper was undated and unsigned. Judging from the uniform prescribed for the "Secretary," in the list, the period was some time ago, before it was absolutely necessary to wear much for polite society.

The list is that of uniforms on regle at a royal reception, from the king down. It appears in the archives as follows:

BRIGHT FUTURE FOR TEMPLO RANCH.

Templor Ranch Stock is in great demand in California, and it is reported that sales have been made as high as 50 Cents per share.

The stock has been in active demand for some time, both in San Francisco and Los Angeles, due to the knowledge that the Templor Ranch Oil will soon be able to market its entire daily production.

On account of the large acreage controlled by the Company and the great increase in production that can be obtained at small cost, the prospects are particularly bright for the stockholders.

It must be borne in mind that the present production is from only a very small portion of the property. With one well to each three acres, there is room on the Templor Ranch property for at least 166 wells, and a production that will enable the company to pay large dividends.

To those familiar with the property of the company, the stock has always been regarded as a splendid investment for future returns.

Those who contemplate buying Templor Ranch Oil shares should at once secure their shares in anticipation of an early rise in price, while I can offer it at 40 cents per share.

Women Appreciate

That which Combines beauty and usefulness

"The Great White Frost Refrigerator"

The White Frost is a beauty that every woman is proud to have in her home. But aside from its appearance it has points that attach it to the owner more strongly. Of this refrigerator the question, "Is there a perfect refrigerator made?" can be truthfully answered in the affirmative.

Because it is a metallic refrigerator, made entirely of galvanized sheet steel, with solid brass trimmings.

Because there is not one stick of wood as large as a tooth-pick connected with it in any manner.

Because it is coated with white enamel inside and out (excepting ice chamber).

Because, after it has been coated with said white enamel, it is placed in an oven of high temperature and the enamel thoroughly baked on. Because it is cylindrical in form, and has no nasty corners to dig out. Because steel will not shrink, swell, warp or decay.

CONVENIENCE

It is the handiest refrigerator made, because it has revolving shelves.
